

Version History

Version 8

Version 8.1.0 - January 2021

Vigilens Web

- Dynamic management of query execution environments from JDE (JDEUTIL prerequisite)
- Ability to call the web interface using HTTPS protocol

Complementary applications

- Web Interface Setup Application (WebConfig)
- New VglUpdateQueries application that allows you to modify (interactively or in batch mode) the data source and the Excel templates for all the queries in a tree structure.

Version 8.0.0 - September 2020

Version 8.0.0 - September 2020

Vigilens Web

- Complete redesign of the user interface
- Bookmark Management
- Widgets Management

Vigilens Designer

- Multi-language management
- Translation of query name, description, columns, execution parameters...
- Ability to customize the query icon

Version 7

Version 7.6.0 - September 4, 2018

Vigilens AdminTool

- Recovery of the JDEdwards user for the execution of VIGILENS queries.

- Possibility to use the line security defined in JDEdwards by associating a JDE ROLE with a Vigilens user.

Version 7.4.0 - January 12, 2018

Vigilens Designer

- Ribbon menus (Microsoft Office type) and new icons.
- Possibility to customize the queries icon Possibility to insert data matrix in the report editor.
- Generation of URLs corresponding to queries.
- Ability to modify numeric fields in sum and vice versa.

Version 7.3.0 - June 19, 2017

Vigilens Designer

- “Group of queries” type queries (consecutive execution of a series of selected queries).

Vigilens Viewer/Web

- Possibility to enter the operator in the parameters at runtime (and no longer only the values).

Version 7.2.0 - April 07, 2017

Vigilens AdminTool

- Possibility to assign several sub-directories to a user (both for viewing shared queries and for publishing them).
- Possibility to create users of type VIGILENS DEDICATED (VIEWER with reserved access).
- Direct access to the modification of certain components of the queries (conditions, list of fields to be visualized, restitutions).
- Possibility to specify a macro to be executed after data insertion during MSEXcel restitution.

Vigilens Designer

- For Excel type output, the possibility to merge the range of cells corresponding to the inserted data with any existing range of cells (with the same name).
- Possibility of reducing the time needed to retrieve the data (by deactivating the record counter and the [Cancel] button).

Vigilens Viewer/Web

- Possibility to apply the format defined at Vigilens level in MSEXcel restitutions.

Vigilens Web

- Addition of the vglHeader parameter in Vigilens URLs allowing to choose the information to be displayed in the header. (name and descriptions of the columns).

Version 7.1.0 - September 16, 2016**Vigilens AdminTool**

- Possibility to set the opening of MSEXcel files in a new window.

Version 7.0.0 - April 15, 2016**Validated compatibility with Windows 10****Vigilens Monitor**

- New application allowing the creation of indicator pages refreshed according to a configurable frequency (requires an additional dedicated license).

Vigilens Designer

- Possibility to select tables in relation to existing standard joints.
- Addition of the original query in the publication information.
- Possibility to define a format for the reconciliation fields on this type of query.

Vigilens Viewer/Web

- Ability to display descriptions associated with fields such as address, cost center, company, item (JDEdwards databases only).
- Ability to export data from the consultation grid to a dynamic cross table.

Vigilens Viewer

- Calling a Vigilens request from a JD Edwards web menu using the connected JDE profile (requires a specific JDE application, features provided to Vigilens clients on request).

Version 6.5.02 - May 2, 2015**Vigilens AdminTool**

- Possibility to use the line security defined in JDEdwards by associating a JDE profile with a

Vigilens user.

- Possibility to mass import Vigilens profile/JDE profile/data source associations.

Vigilens Designer

- Ability to generate text files without field and/or record separator, with choice of encoding format UTF-8 Business queries.
- Availability of a pack of model queries for the Finance professions on the ERP ORACLE JDEdwards (requires a special license).

Version 6

Version 6.4.0 - July 18, 2014

Vigilens AdminTool

- Connection to Oracle databases with OCI instead of ODBC (better memory management for string size).
- Ability to define a DB2/400 type runtime statistics database.

Vigilens WebConfig

- Possibility to define a time out linked to the last activity on a query (it is recommended that this time out be greater than the query execution time).
- Possibility to limit the number of lines in the result (to limit the risk of saturation of the browser memory).
- Possibility to choose the day of the beginning of the week (calendar display).

Vigilens Designer

- Possibility to quickly modify the data source or the environment of a query (and possibly its subqueries) without scrolling down all the screens.

Vigilens Viewer

- Limitation of the number of lines in automatic mode (using the vgIMaxLineNumber parameter).
- VigilensOPManage A return type "The same type as last input parameter" is now available.

Version 6.3.3 - September 04, 2013

Vigilens Designer

- Possibility to choose the extension of text-type files.

Vigilens Designer/Viewer

- The query summary displays the list of recipients for email type returns.

Vigilens Viewer/Web

- Date functions return the value “Null” when the data is not filled Table names are no longer case sensitive for export to a database (Oracle).

Version 6.3.1 - May 29, 2013**Vigilens Designer**

- Possibility to define Excel renderings in XLSM format (including macros).

Version 6.3.0 - March 07, 2013**Vigilens Designer**

- Possibility to define formats at user level New “IfThen” functions.

Version 6.2.0 - December 27, 2012**Vigilens AdminTool**

- Improved ergonomics to restrict access to data sources.

Vigilens Viewer/Web

- Excel returns (no longer CSV) in web or scheduled mode (see impacts specified in the installation procedure).

Version 6.1.0 - October 05, 2012**Vigilens AdminTool**

- Version management for Oracle databases (V8 and lower / V9 and higher).

Warning: Existing Oracle databases will be considered V9 and higher.

Vigilens Designer

- Implementation of query history management (creation, modification, and publication).
- Possibility to create “full join” type joins (not available for Access and Oracle databases below V9).
- Management of the Excel document format (.xls or .xlsx).

Version 5

Version 5.3 - 2010

- Email
- Barcode
- Conditional formatting

Version 4

Version 4.6 - 2007

- Reports in PDF format
- Multi-request states
- Annexes (JDE)

Version 3

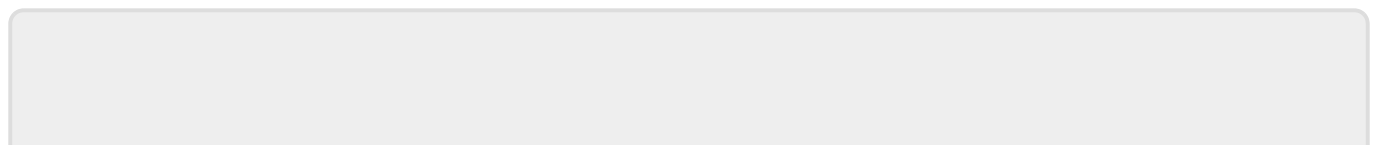

Version 3.3 - 2005

- Web execution
- Multilingual
- Management of decimals(JDE)

Version 1

Version 1.2 - 2003

First commercialized version
