Quick Start

- Queries creation / modification : [Discover the steps to create your first Vigilens query](#).
- [Print editor](#) : make document printouts from your queries data.

HowTo

- [Good Practices](#) : our recommendations to build your queries.
- Need to [retrieve SQL code](#) generated by a query?
- Need to [create URL](#) to a report?
- ...

Check out these guides and others on our [dedicated page](#).

Version History

Vigilens Reporting is currently in version **V 8.0.0** . For details of changes by version, see [the dedicated page](#).

Application Vigilens Designer in a few words

- Can be used in German, English, Spanish, French, Italian, or Slovak (user's choice).
- Access to any type of database by ODBC / OCI link.
- Building queries through a wizard :
 - **Inquiry** = Restitution of data meeting selection criteria.
 - **Coherence** = Restitution of data that does not comply with business rules.
 - **Matching** = Restitution of data resulting from various data sources and meeting selection criteria.
 - **Union** = Consolidation of data resulting from other queries.
- **Query group** = Sequenced execution of selected queries.
- **SQL parsing** = Direct entry of a script in SQL syntax (SELECT only).
- Construction of multidimensional restitution axes: zoom on consolidated institutions.
