

Management > Set User Menu

This menu is used in conjunction with the **Group Management** window and the **User Management** window. See [Admintool](#). If some buttons are grayed out, it means that a user must be selected in either of the two Management windows.

User properties

When we create or modify a user, we have access to all his properties.

The user settings are similar to [those defined at the group level](#), with a few exceptions.

Global

The screenshot shows the 'User setup' dialog box with the following details:

- Tab: Global
- User: WEB_DEMO_EN
- Group: URL_WEB_USERS
- Use the type of user defined at group level
- Limit the number of simultaneous logged users (value: 1)
- Dedicated work folder
- Use of the connection type from group level
 - Enable connection without login (if Windows user matches a Vigilens one)
- Buttons: OK, Cancel, Setup for emailing...

If you uncheck use the type of user defined at group level, you can choose not only Vigilens viewer/web and Vigilens Designer, but **Vigilens Dedicated** too. This latest profile allows reserving one connexion (license) for this user. This is useful when you want to be sure that a free connexion will be available for this user at run time.

Rights restrictions

Identical to group rights restrictions, but if a box is checked at group level, you cannot un-check it at user level.

Time out

Identical to group time out, but values must be lower than what is defined at group level.
