

Management > Set User Menu

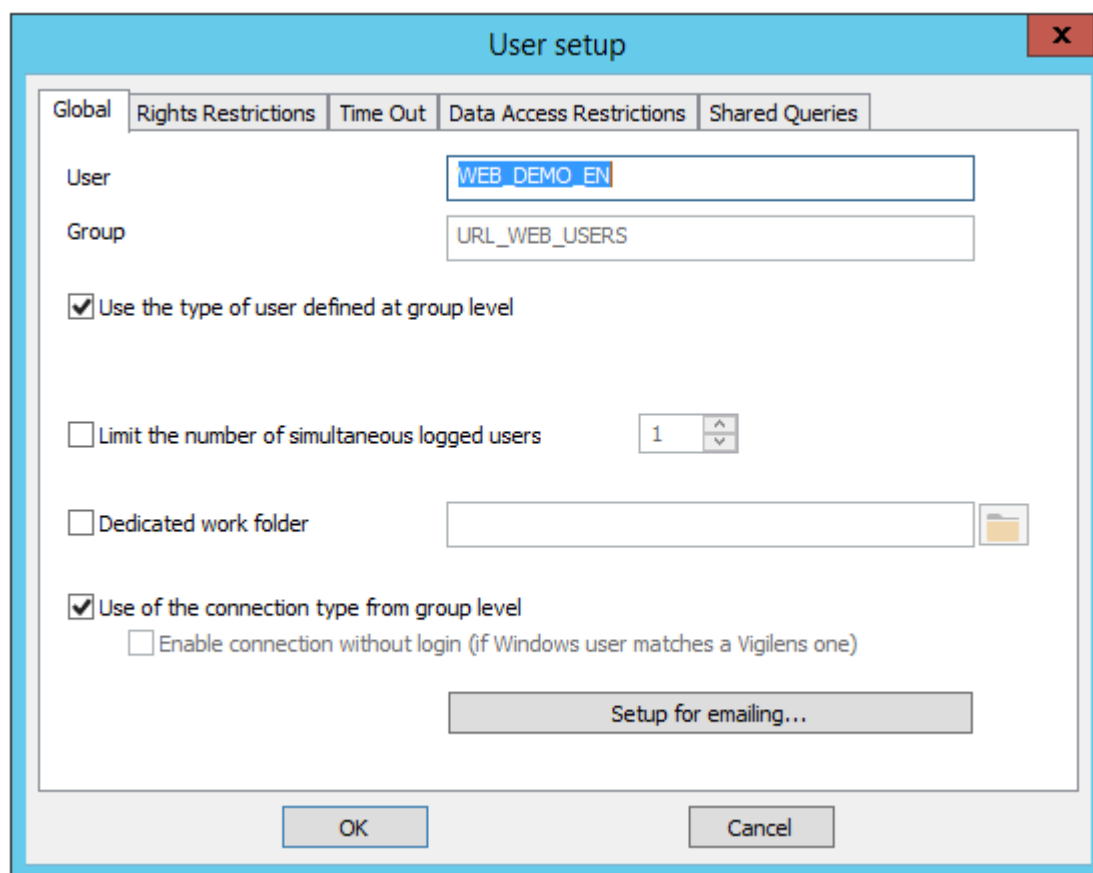

This menu is used in conjunction with the **Group Management** window and the **User Management** window. See [Admintool](#). If some buttons are grayed out, it means that a user must be selected in either of the two Management windows.

User properties

When we create or modify a user, we have access to all his properties.

The user settings are similar to [those defined at the group level](#), with a few exceptions.

Global

The screenshot shows the 'User setup' dialog box with the 'Global' tab active. The 'User' field contains 'WEB_DEMO_EN' and the 'Group' field contains 'URL_WEB_USERS'. The checkbox 'Use the type of user defined at group level' is checked. The checkbox 'Limit the number of simultaneous logged users' is unchecked, with a spinner box set to '1'. The checkbox 'Dedicated work folder' is unchecked, with a file explorer icon to its right. The checkbox 'Use of the connection type from group level' is checked, and its sub-checkbox 'Enable connection without login (if Windows user matches a Vigilens one)' is unchecked. A 'Setup for emailing...' button is located below the checkboxes. At the bottom of the dialog are 'OK' and 'Cancel' buttons.

If you uncheck use the type of user defined at group level, you can choose not only Vigilens viewer/web and Vigilens Designer, but **Vigilens Dedicated** too. This latest profile allows reserving one connexion (license) for this user. This is useful when you want to be sure that a free connexion will be available for this user at run time.

The dedicated working directory is the location where queries that the user can create, modify or delete are stored. If no working directory is specified, the "Archives" subdirectory of the directory where Vigilens was installed is used by default.

Be careful, this is a problem when using Vigilens on several different machines (for example, using Windows TSE with several servers). Indeed, in this case, the user is likely to use several different directories depending on the machine on which he is connected. In this case, it is strongly recommended to specify a working directory for each user.

This directory can be based on environment variables which allows, for example, to use several different directories, depending on the Windows user, for the same Vigilens user.

Rights restrictions

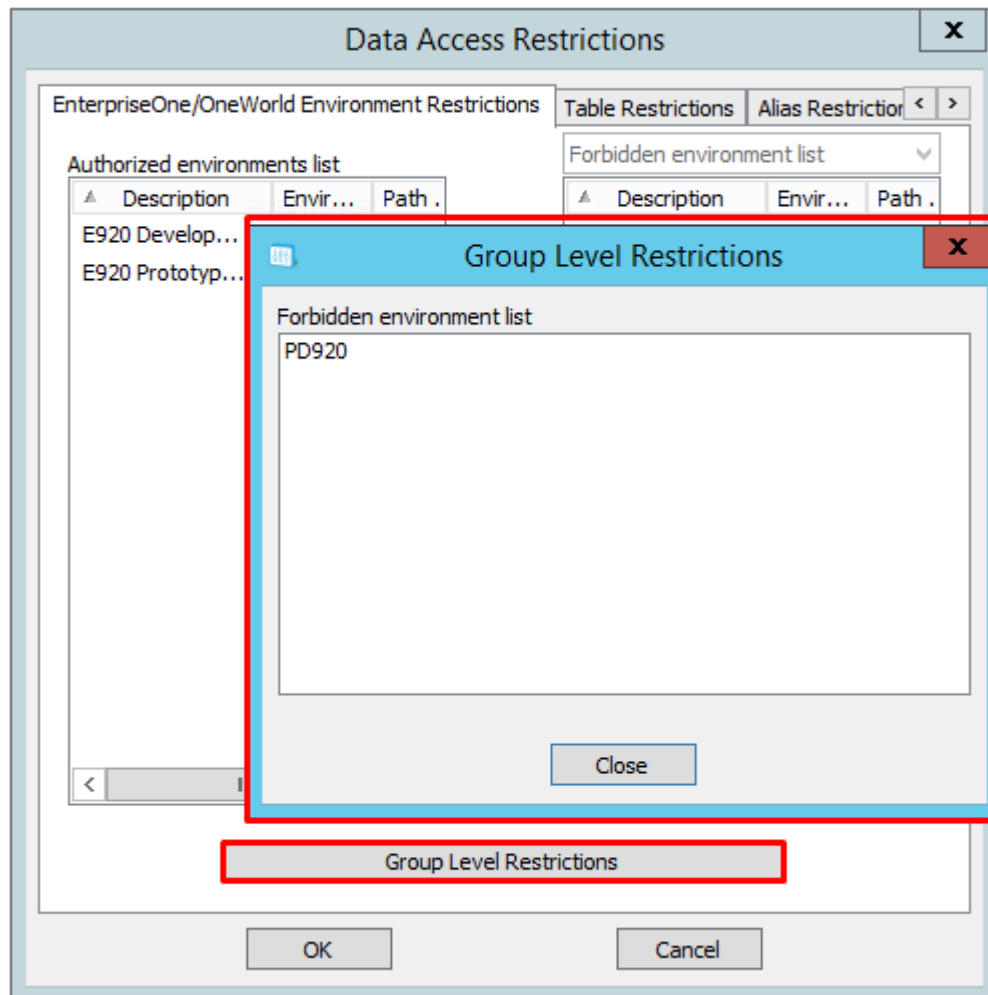

Identical to group rights restrictions, but if a box is checked at group level, you cannot un-check it at user level.

Time out

Identical to group time out, but values must be lower than what is defined at group level.

Data restriction

Identical to group data restrictions. However, if security is defined at group level, you cannot bypass it at user level. A Group Level Restrictions button let you see what is defined at group level.

Shared queries

You can either use the group settings or specify different directories.

Change user language

 Change user language

The dialog box is titled "SRIVIER" and has a red close button (X) in the top right corner. It contains a section labeled "Langues" with two dropdown menus. The first dropdown is labeled "Language used for application" and is set to "Français". The second dropdown is labeled "Language used for descriptions from database" and is set to "French". At the bottom, there are "OK" and "Cancel" buttons.

Move to another group

 Move to another groupe Not used much, it is more natural to drag & drop users from one group to another.

The dialog box is titled "Move to another groupe (SRIVIER)" and has a red close button (X) in the top right corner. It contains a dropdown menu with "<Default>" selected. At the bottom, there are "OK" and "Cancel" buttons.

Change user password

 Change user password

The dialog box is titled "Set Password (SRIVIER)" and has a red close button (X) in the top right corner. It contains two text input fields: "New password" and "Confirm new password". At the bottom, there are "OK" and "Cancel" buttons.

There is no restriction on password length/characters used.
