	г
OK	

Sub-section

At the time of report construction, it is possible to add a sub-section with data from another report.

After clicking the Subsection button, a location on the report design must be selected. Vigilens then asks which query should be called.

In the properties of a sub-section, in addition to the classic Position/Size, Border and Background color Frame tabs, there is the Link to Query tab. It allows you to change the query called by the sub-section and to specify the values of the parameters when calling this subquery.
