For a section

In the properties of a section, in addition to the classic `Position/Size`, `Border` and `Background color` tabs, there is the Section tab, which allows you to manage page breaks and titles display.

Allowed options depend on the section type.

for Body section:

for Level break header:

Inserts

Text

 Allows the addition of a static label on the report.

This type of object has the same properties as a field, except that the label is typed while fields are chosen in a list.

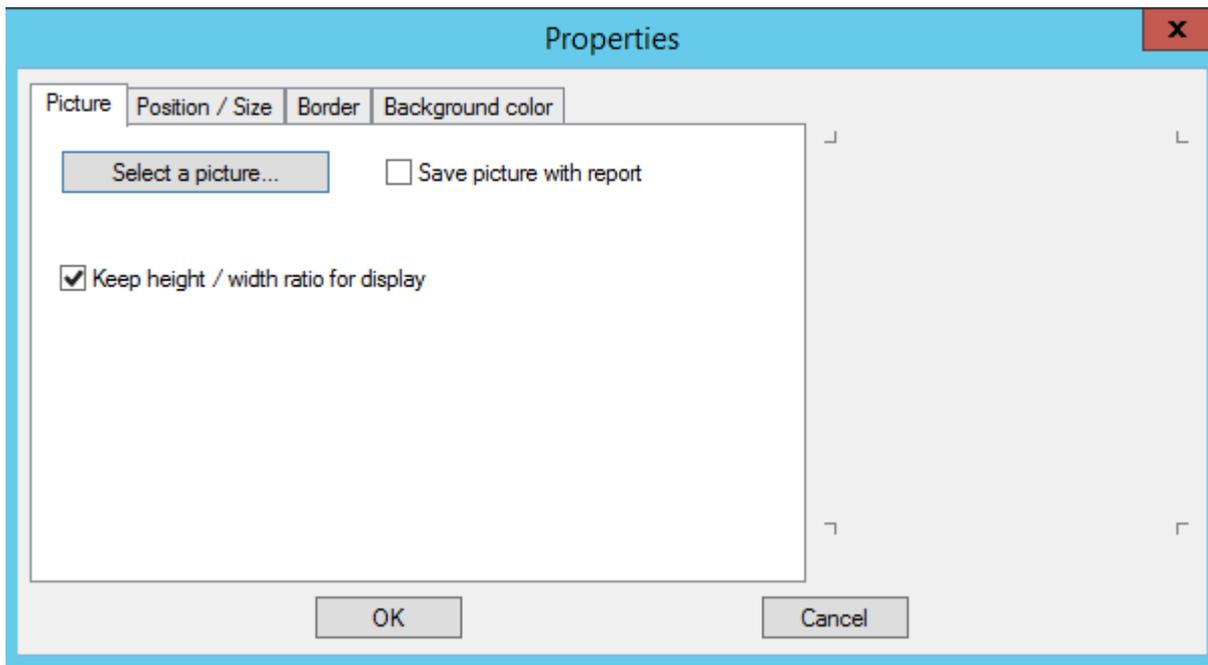

Picture

Allows you to add an image. This image can either be left on the server or incorporated into the

report. In the properties of a sub-section, in addition to the classic `Position/Size`, `Border` and `Background` tabs, there is a `Picture` tab, which gives access to the specific properties of this type of object.

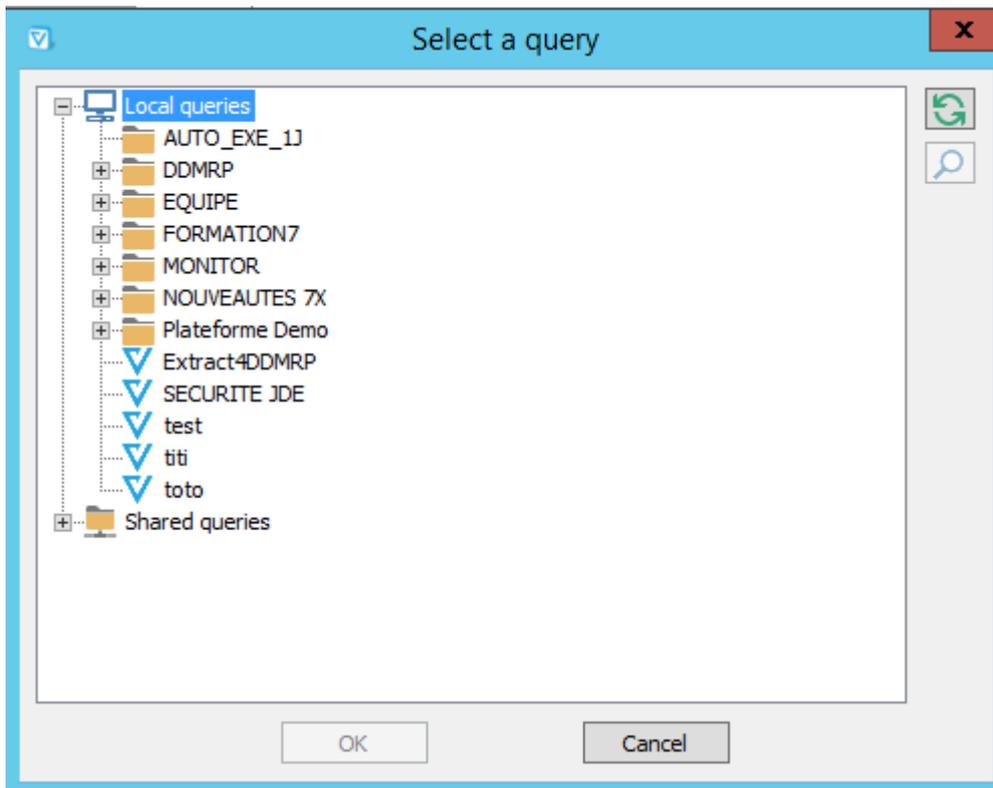

Sub-section

At the time of report construction, it is possible to add a sub-section with data from another report.

After clicking the Subsection button, a location on the report design must be selected. Vigilens then asks which query should be called.

In the properties of a sub-section, in addition to the classic `Position/Size`, `Border` and `Background color` Frame tabs, there is the Link to Query tab. It allows you to change the query called by the sub-section and to specify the values of the parameters when calling this subquery.
