

Output

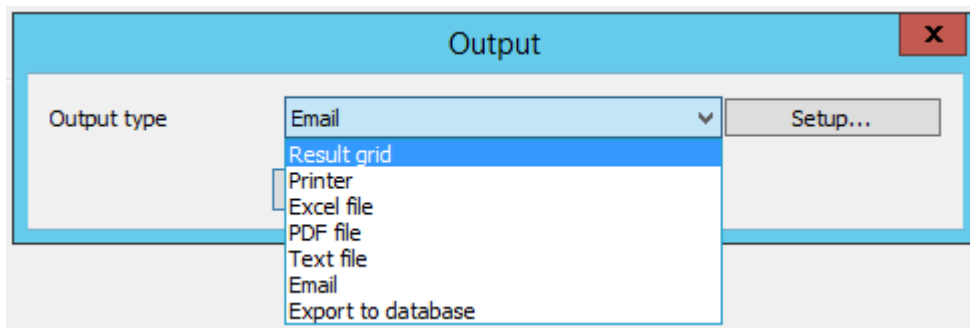

There are two outputs modes :

- Interactive output: user actively run the query
- Batch output: all queries of a directory are run

These two modes are set up separately.

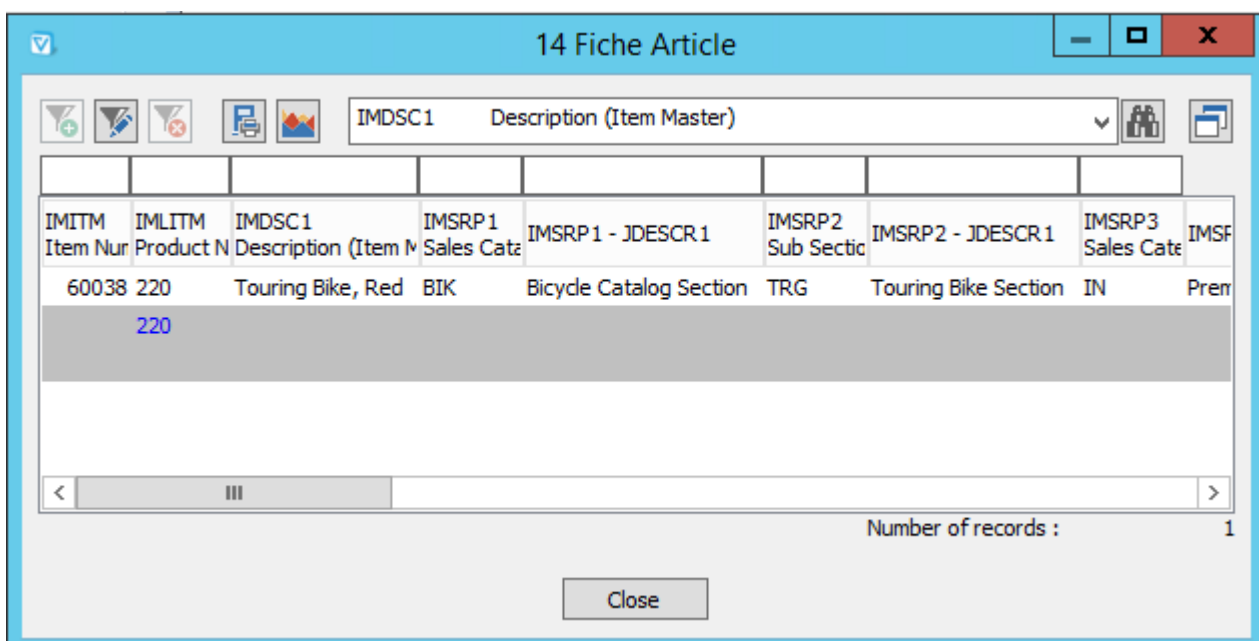

Interactive Output

Output types

Result Grid

Most used output

[see dedicated page](#)

Printer

The image shows two overlapping dialog boxes. The top one is titled 'Output' and has a close button (X) in the top right. It contains a dropdown menu for 'Output type' set to 'Printer', a 'Setup...' button to its right, and 'OK' and 'Cancel' buttons at the bottom. The bottom dialog box is titled 'Print' and also has a close button (X) in the top right. It contains two radio buttons: 'Print result grid' (unselected) and 'Report' (selected). Below the radio buttons is a label 'Use the following report layout :' followed by a dropdown menu set to 'V8' and a three-dot menu icon. Underneath is a label 'Printer' followed by a dropdown menu set to 'user default printer'. 'OK' and 'Cancel' buttons are at the bottom.

Excel File

The image shows a single dialog box titled 'Output' with a close button (X) in the top right. It contains a dropdown menu for 'Output type' set to 'Excel file', a 'Setup...' button to its right, and 'OK' and 'Cancel' buttons at the bottom.

Excel file✕

File Type

Excel Workbook 97 - 2003 (*.xls) Excel Workbook 2007 (*.xlsx) *

Excel Macro - Enabled Workbook 2007 (*.xlm) *

* Files are created without using MS Excel application (improves speed)

Define a file:

...

Purge file, if it exists, before downloading fresh data

Model

Choose a model

...

Location

Define a sheet

Define a target cell

Cell range name

Merge with a potential row range that could exist

Apply format set at Vigilens level

After data insert

Macro to launch

Update each field within the file

Add column name **Remarks**

Add field description

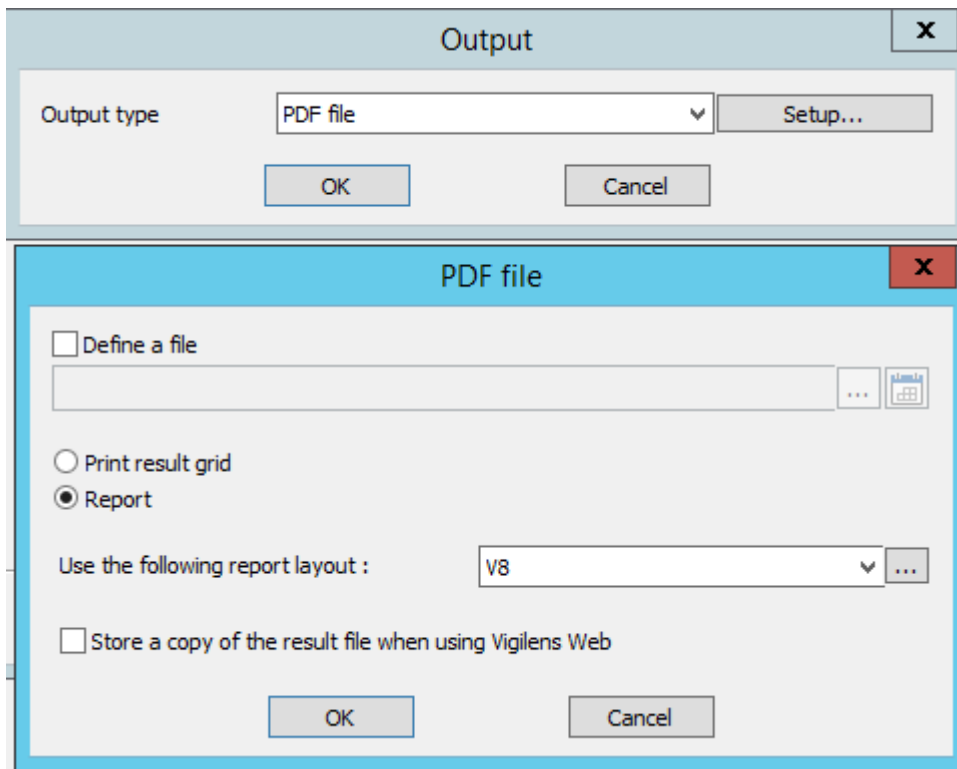

Store a copy of the result file when using Vigilens Web

Text File

The image shows two overlapping dialog boxes. The top dialog, titled "Output", has a close button (X) in the top right. It contains a dropdown menu for "Output type" set to "Text file", a "Setup..." button to its right, and "OK" and "Cancel" buttons at the bottom. The bottom dialog, titled "Text file", also has a close button (X) in the top right. It features a "Define a file" checkbox with an empty text field and a file selection icon. Below this is the "File format" section with two radio buttons: "UTF-8 without BOM" (selected) and "UTF-8 with BOM". The "File extension" is set to "txt" in a dropdown, with a "Remarks" text area to its right. There are two checked checkboxes: "Add column name" and "Add field description". The "Fields separator" is set to "<Tab>" and the "Records separator" is set to "<Return>". At the bottom, there are two unchecked checkboxes: "Please frame records with character:" and "Store a copy of the result file when using Vigilens Web". "OK" and "Cancel" buttons are at the very bottom.

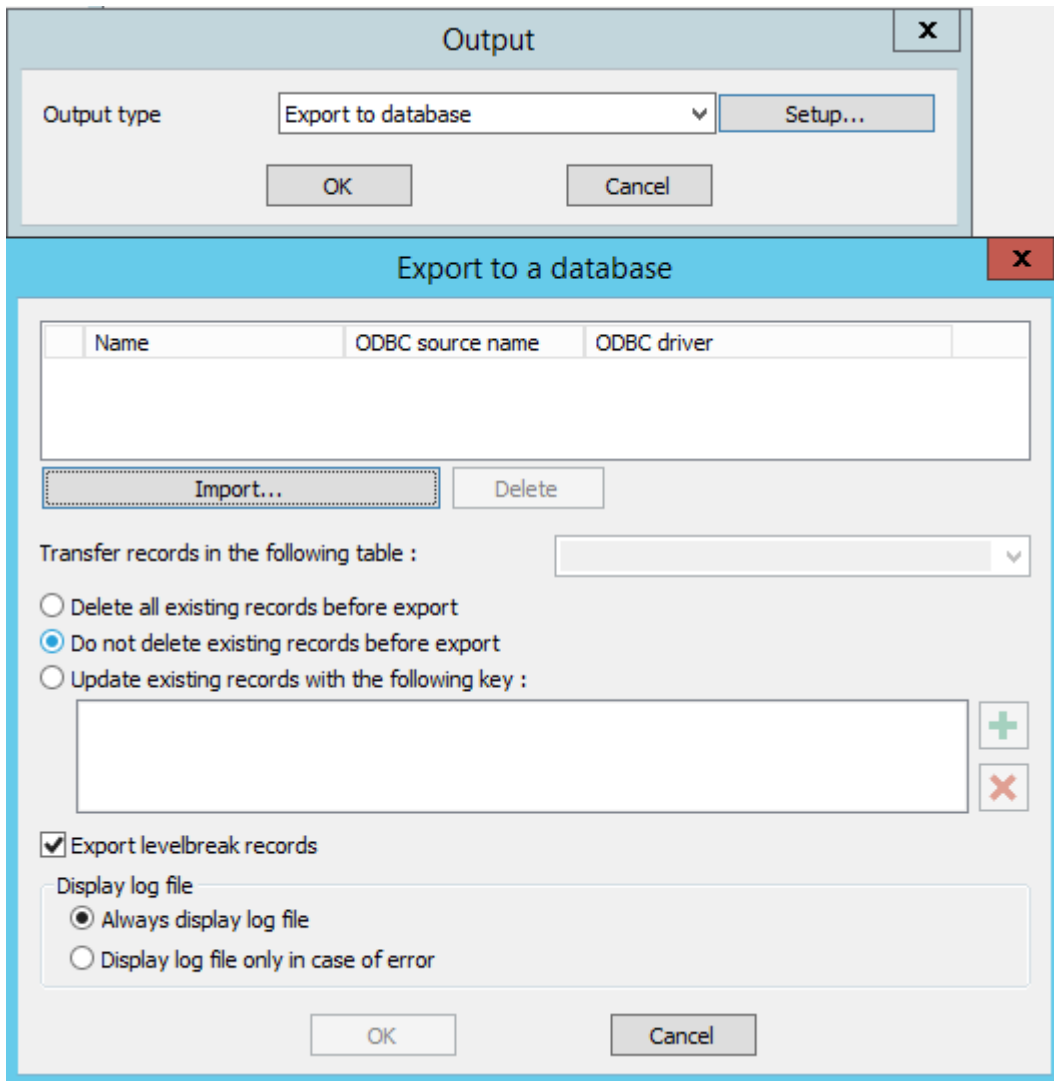

Email

The image shows two overlapping dialog boxes. The top one is titled 'Output' and has a dropdown menu for 'Output type' set to 'Email', with 'Setup...', 'OK', and 'Cancel' buttons. The bottom one is titled 'Email' and contains fields for 'Sender' (support@vigilens.fr), 'To...' (guillaume.duboust@vigilens.fr), 'CC...', 'BCC...', and 'Subject' (VIGILENS : Article/Item). It also has an 'Attachment' section with '<Output File>', a 'Delete result files after sending' checkbox, and a text area with 'Please do not reply to this email'. 'OK' and 'Cancel' buttons are at the bottom.

It is possible to use parameters to populate the list of recipients

Export to database

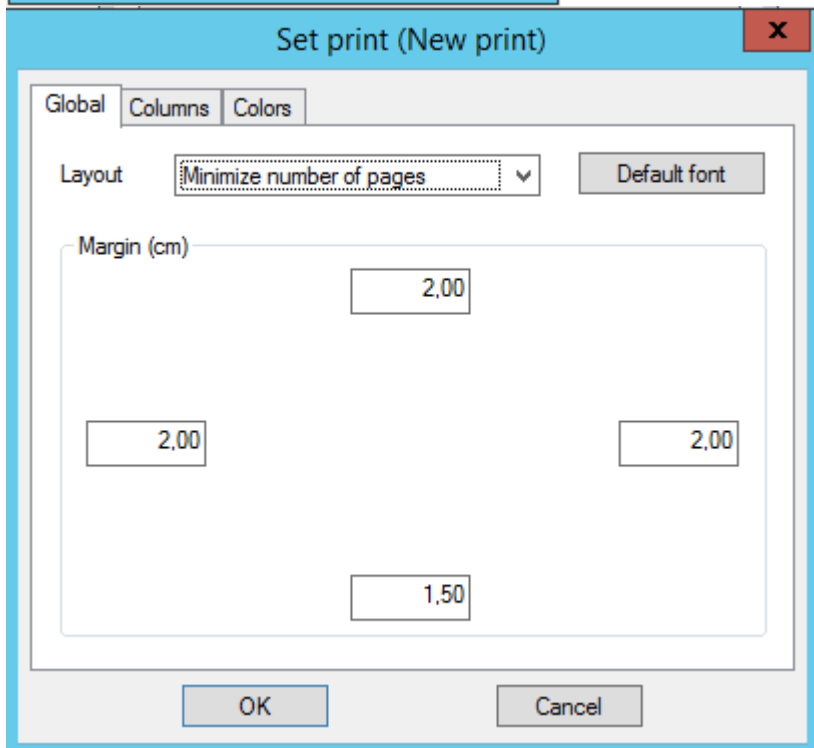

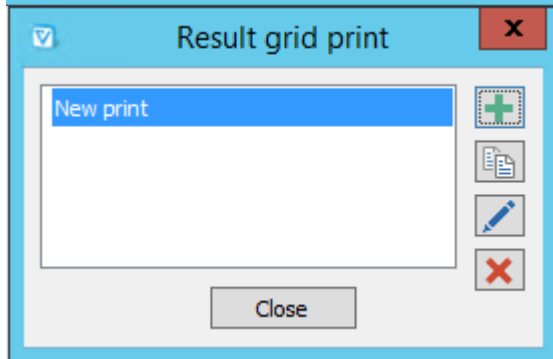

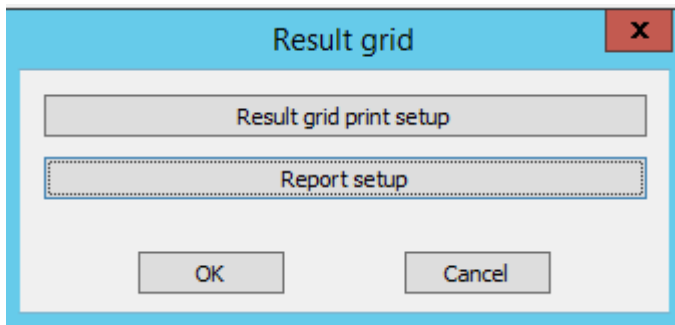

Output layout

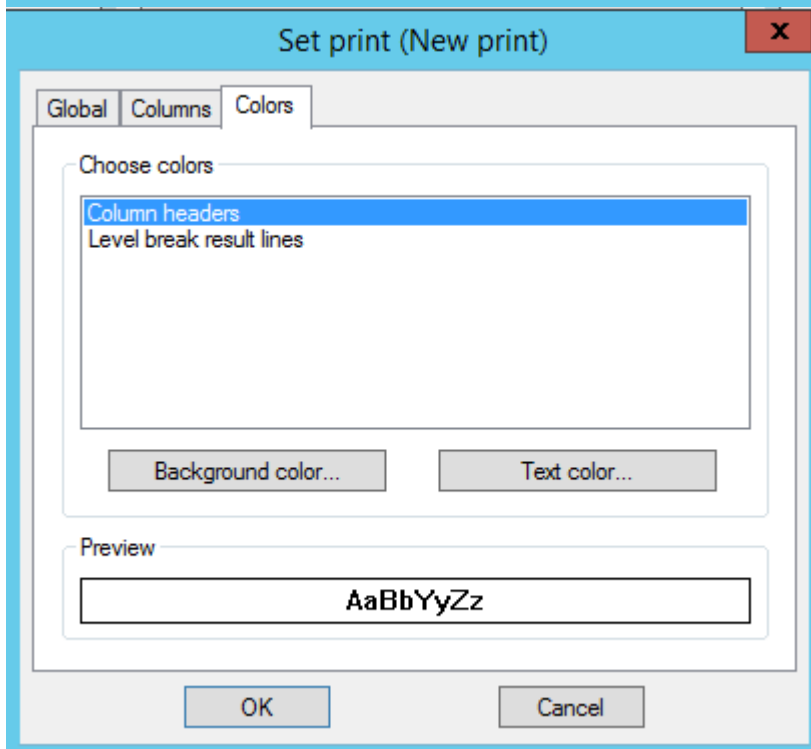

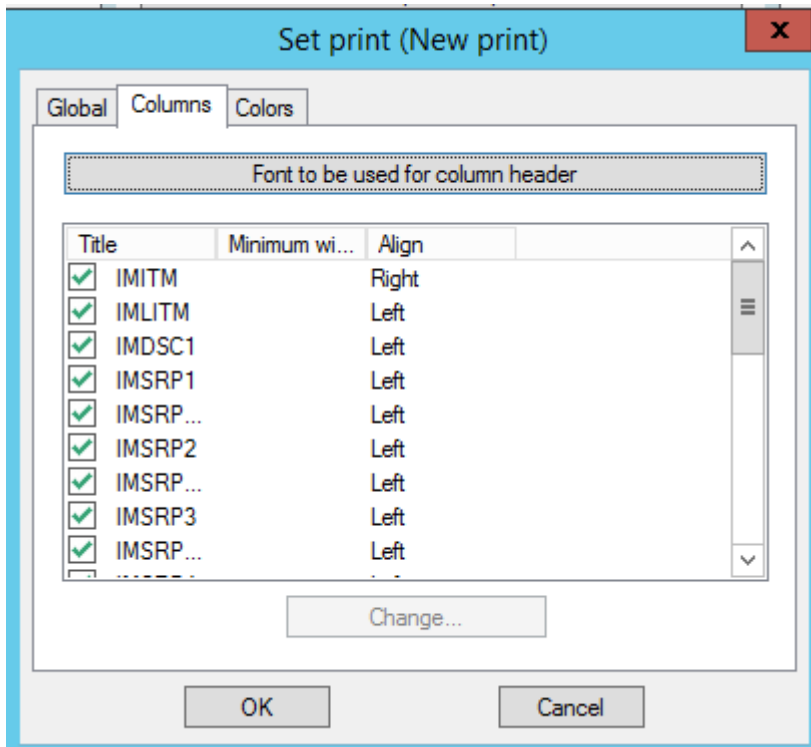

When printing, for example in a PDF, you can choose one of two types of output formats: grid format or report.

Result Grid setup

When you choose the [interactive output](#), click on Setup...

Report setup

[See dedicated page](#)

Batch Output

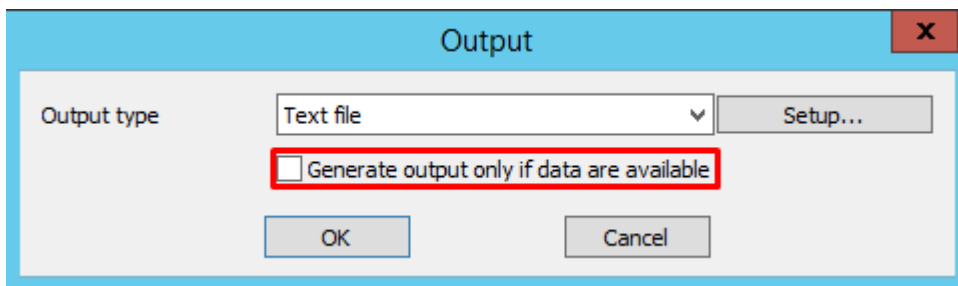

The batch output mode has a separate setting from the interactive mode, but the setting fields are the same.

In batch mode, you can choose not to produce an output if there is no data.

This feature is heavily used in the case of consistency check queries (searching for clients without a G/L key). The scheduled query runs every x minutes looking for the anomaly and for example sends a mail if the result is positive.

[See scheduler page](#)

All output types except grid are available, as well as grid or report output formats.
