

Output

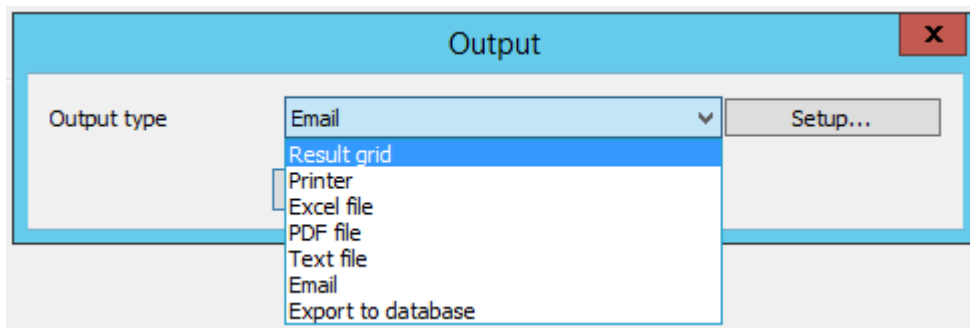

There are two outputs modes :

- Interactive output: user actively run the query
- Batch output: all queries of a directory are run

These two modes are set up separately.

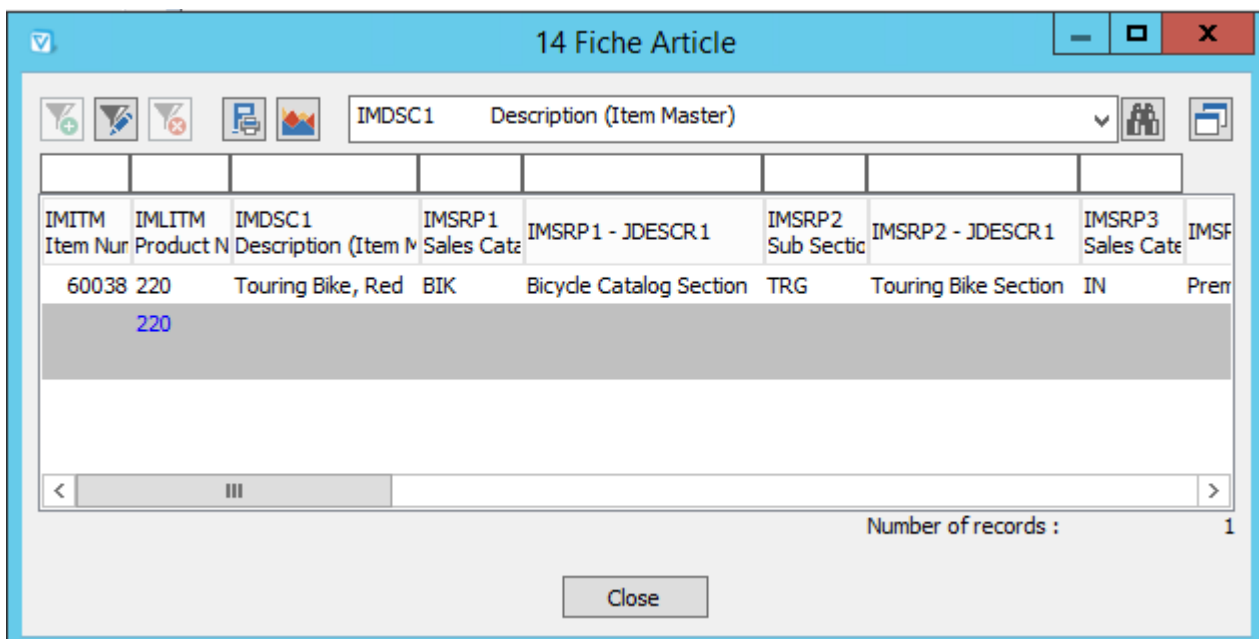

Interactive Output

Output types

Result Grid

Most used output

[see dedicated page](#)

Printer

The image shows two overlapping dialog boxes. The top one is titled 'Output' and has a close button (X) in the top right. It contains a dropdown menu for 'Output type' set to 'Printer', a 'Setup...' button to its right, and 'OK' and 'Cancel' buttons at the bottom. The bottom dialog box is titled 'Print' and also has a close button (X) in the top right. It features two radio buttons: 'Print result grid' (unselected) and 'Report' (selected). Below the radio buttons is a label 'Use the following report layout :' followed by a dropdown menu showing 'V8' and a three-dot menu icon. Underneath is a label 'Printer' followed by a dropdown menu showing 'user default printer'. 'OK' and 'Cancel' buttons are at the bottom.

Excel File

The image shows a single dialog box titled 'Output' with a close button (X) in the top right. It contains a dropdown menu for 'Output type' set to 'Excel file', a 'Setup...' button to its right, and 'OK' and 'Cancel' buttons at the bottom.

Excel file✕

File Type

Excel Workbook 97 - 2003 (*.xls) Excel Workbook 2007 (*.xlsx) *

Excel Macro - Enabled Workbook 2007 (*.xlm) *

* Files are created without using MS Excel application (improves speed)

Define a file: ...

Purge file, if it exists, before downloading fresh data

Email

Export to database

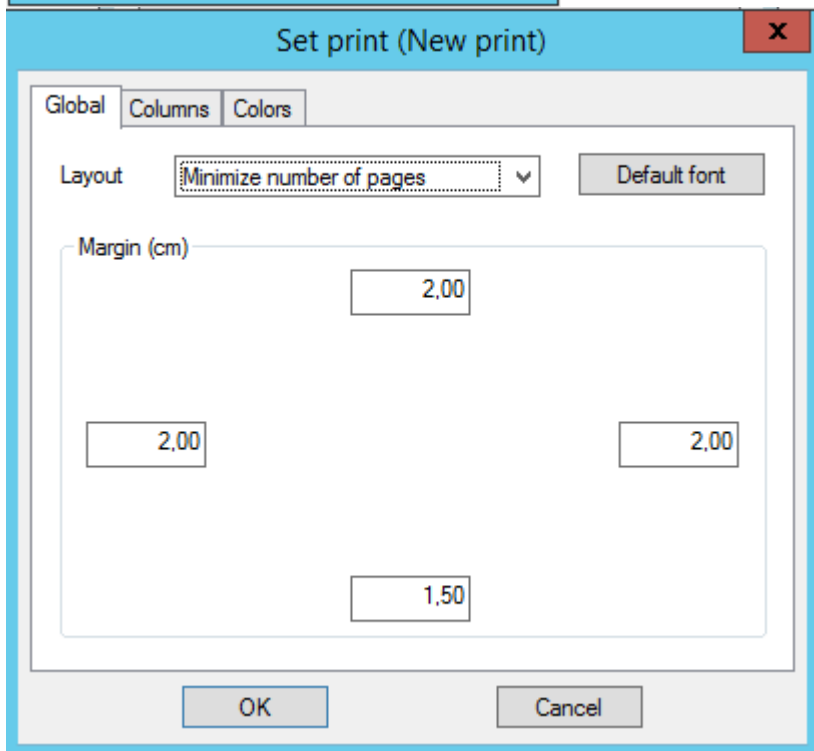

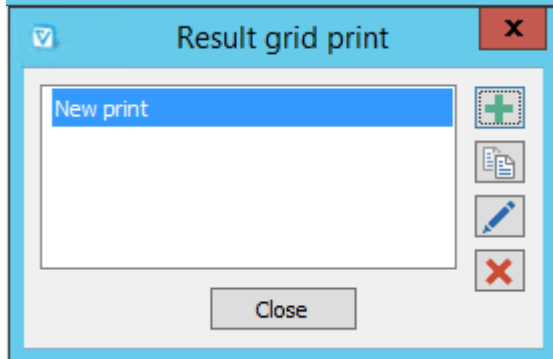

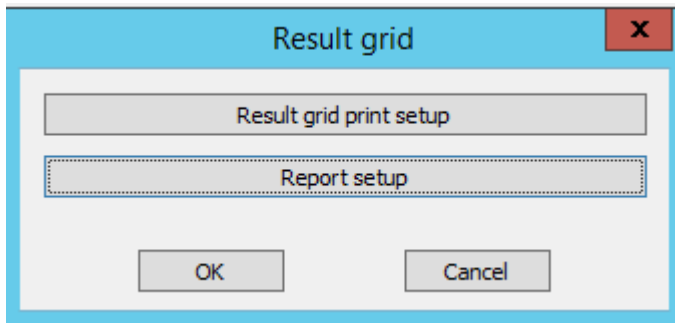

Output layout

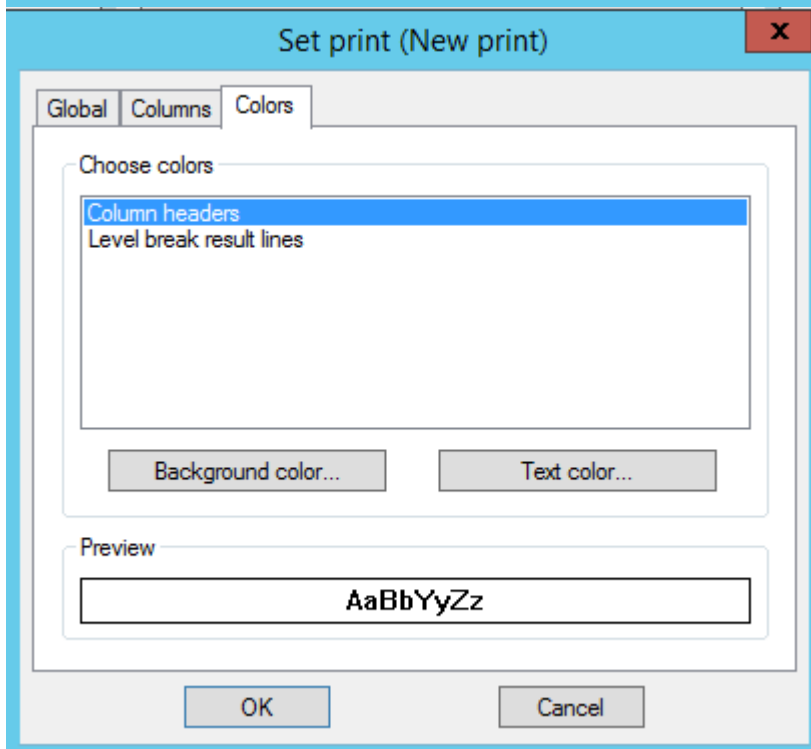

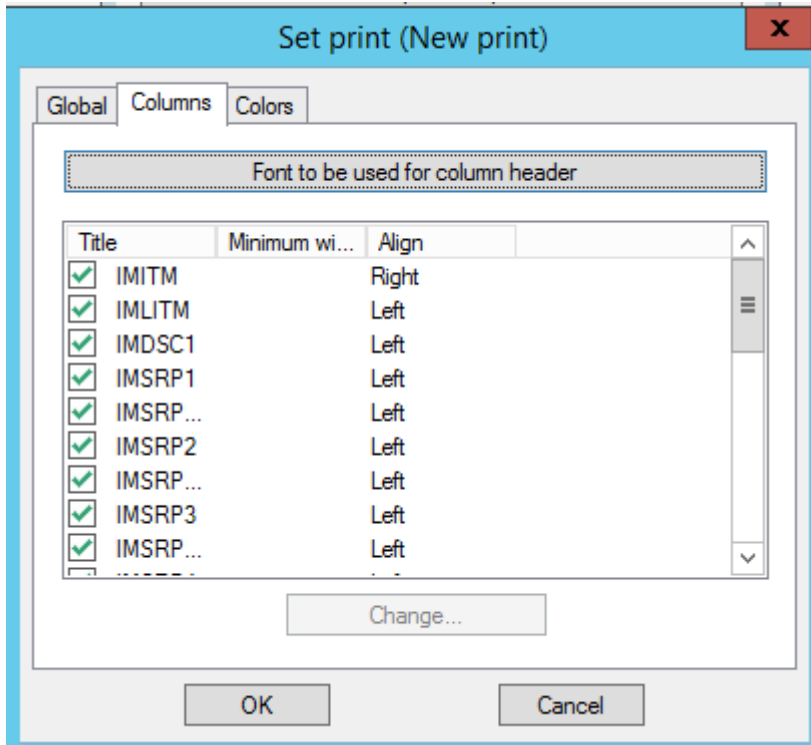

When printing, for example in a PDF, you can choose one of two types of output formats: grid format or report.

Result Grid setup

When you choose the [interactive output](#), click on Setup...

Report setup

[See dedicated page](#)

Batch Output

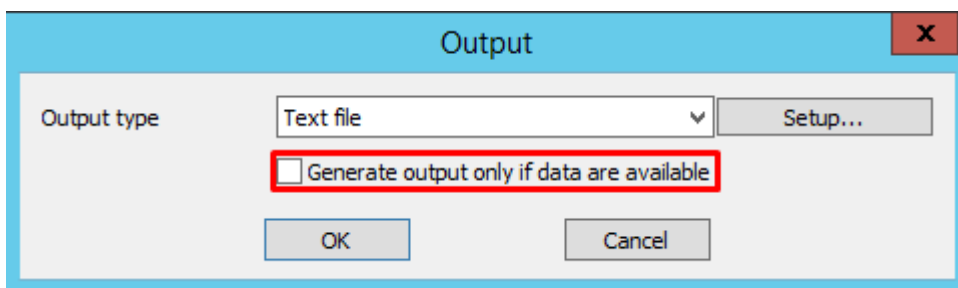

The batch output mode has a separate setting from the interactive mode, but the setting fields are the same.

In batch mode, you can choose not to produce an output if there is no data.

This feature is heavily used in the case of consistency check queries (searching for clients without a G/L key). The scheduled query runs every x minutes looking for the anomaly and for example sends a mail if the result is positive.

[See scheduler page](#)

All output types except grid are available, as well as grid or report output formats.
