

SQL Query

Usage

This type of query, **available only for SELECT**, allows you to enter directly in SQL code the selection of data

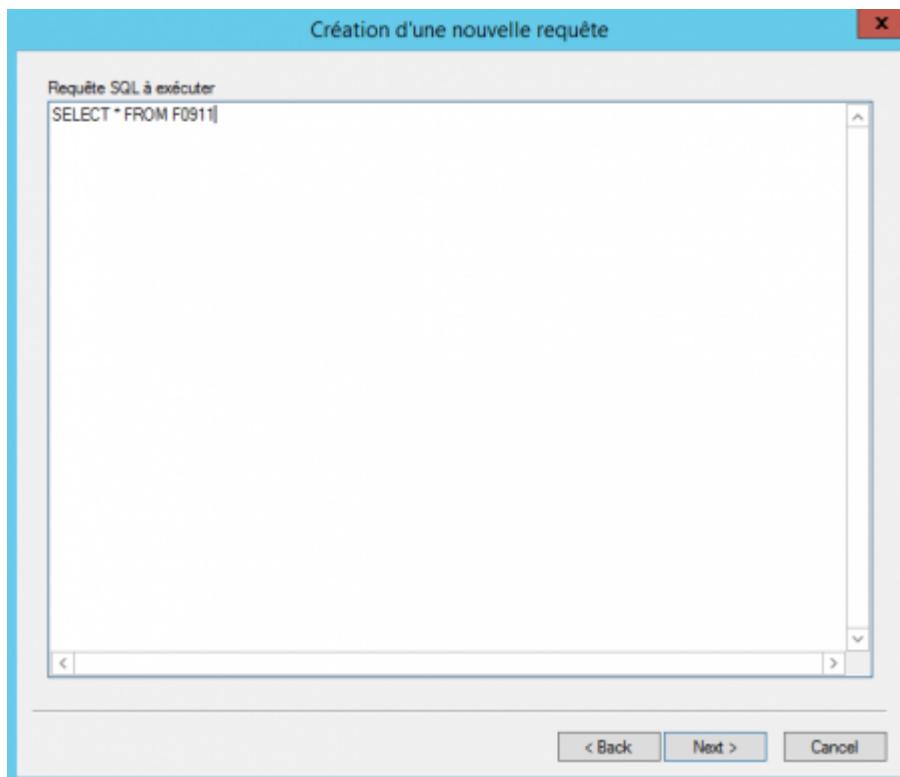

Difference from inquiry

SQL Input

This screen provides a text field for entering the query.

You just have to make a “SELECT *” since a [field selection screen](#) is available

Screens saved

Few screens are kept compared to the [consultation](#) :

- [Field selection screen](#)
- [The playback screen](#)
- [Finalization and test screen](#)
