Actions

New query

Page dedicated to query creation.

New folder

Create a new directory

- in the user's folder
- in the shared folder

It is not possible to create a folder in the Query templates panel.

By default, Vigilens users do not have the right to modify the content of the shared directory (create, delete, rename directory or delete, rename query). This authorization must be given to them in the AdminTool application.

Command line

Command line

This tool is a wizard for query scheduling.

Start by selecting an object in the panel Existing and shared requests .

You can select :

- a subdirectory of the published queries directory = Published queries

Last update: 2020/09/10 en:v8_0_0:designer:menus:accueil:start https://vigilens.wiki/dokuwiki/doku.php?id=en:v8_0_0:designer:menus:accueil:start&rev=1599746493 16:01

• any query from the published queries

Published query

Allows to get a command line or a url allowing the execution of the selected query.

Shared Request

	Schedule	
Output Use output type defined at (Create PDF file for report	t query level - V8)	
Result grid	v	
Runtime parametres		
Parameter	Value	
Enter parameter	r ✓Parameter filled	×Parameter not filled
Enter parameter	r ✓Parameter filed	×Parameter not filled
Enter parameter Format	Parameter filed	×Parameter not filled
Enter parameter Format Set decimal separator as fo User	r ✔Parameter filed	XParameter not filled
Enter parameter Format Set decimal separator as fo User Set user	r Parameter filed	×Parameter not filled

The first screen allows you to choose :

- the type of restitution.
- runtime parameters
- the formatting of the decimals
- a username if you don't want to use the one defined by default in the menu Automatic execution of the AdminTool.

Depending on the type of restore, you may have additional control parameters.

×		
×		
×		
The assistant then builds you		

- the URL of the request
- two command lines:
 - $\circ\,$ one for historical windows scripts (cmd)
 - $\circ\,$ the other for the Powershell language.

×

You can copy/paste these strings, and possibly enrich them.

Refer to

- detailed schedule syntax.
- the url syntax

Directory

If you select a directory before clicking on the Command Line button, you will get the following screen, in which you can <u>optionally</u> fill in :

- an email of the recipient of the execution report
- a limit to the number of lines to be extracted
- a username if you don't want to use the one defined by default in the menu Automatic execution of the AdminTool.

×

The wizard then builds two command lines for you:

- one for historical windows scripts (cmd)
- the other for the Powershell language.

You can copy/paste these strings, and possibly enrich them. Refer to detailed syntax for more information.

×

Clipboard

×

Classic copy/cut/paste editing menu. Applies to objects selected in the Existing / Shared Queries panel

Display

×

- · Show / hide the Query templates panel or the status bar
- Update the list of requests
