

# Personalization Menu

## Parameterization

### Database

This screen is the same as [AdminTool](#), except that it has an **Import** button while the [AdminTool](#) has a **Share** button.

When you click on the **Import** button, a dialog box asks which data source must be imported.

. It is possible to secure this part. See [Restrictions](#)

### Help Box

### Global

The number of result files is the blue number in brackets in the [query panel](#).

### Color

### Set User

The user language is configured on this screen, among other things.

# Information window

This is where you can customize the panel [Overview](#).

The screenshot shows the Vigilens Designer interface. The left sidebar contains a tree view of request models, including folders like OZGE, RGR, SYLVAIN, FORMATION7, MONITOR, NOUVEAUTES 7X, Plateforme Demo, and SECURITE JDE. The bottom-left pane shows 'Modèles de requêtes' with a list of models such as 'PACK FINANCE JDEWARDS' and '00\_Compte le Nombre de Centre de Coût'. The main right pane displays the configuration for the selected request 'Commande - Détail'. This configuration includes the source 'JDE\_VIGILENS (EnterpriseOne / OneWorld)', a time out of 5 minutes, and creation/modification dates of 22/06/2020. It also lists the tables used, the joins between them, the fields to be visualized, the sorting criteria, and the list of ruptures.
