

Personalization Menu

Parameterization

Database

This screen is the same as [AdminTool](#), except that it has an **Import** button while the [AdminTool](#) has a **Share** button.

The **Import** button lets you to automatically retrieve the definition of a previously shared data source.

When you click on the **Import** button, a dialog box asks which data source must be imported.

. It is possible to import several data sources at the same time.

In order to take advantage of the specific functionalities of JDE data sources, it is imperative that the data source be imported (even if it already exists on the machine). An imported data source can be recognized by the name of the ODBC driver that appears in the list of databases. For an imported source, the driver name must be "< Direct access via OCI > (Shared)" for an Oracle type database or "Vigilens - Shared DataSource" for a connection via ODBC.

Help Box

Global

The number of result files is the blue number in brackets in the [query panel](#).

Color

Set User

The user language is configured on this screen, among other things.

Information panel

This is where you can customize the panel [Overview](#).

The screenshot displays the Vigilens Designer application interface. The top menu bar includes 'VIGILENS DESIGNER', 'Accueil', 'Personnalisation', and 'Requête'. The 'Personnalisation' tab is active, showing a toolbar with icons for 'Imprimer', 'Historique', 'Fichiers incorporés', 'Fichiers de résultats', 'Copier', and 'Couper'. Below the toolbar, there are sections for 'Execution', 'Edition', 'Fichier', and 'Presse-papiers'. The main workspace is divided into three panes. The left pane shows a tree view of request models, with 'Commande - Détail' selected. The bottom-left pane shows a list of request models under 'Modèles de requêtes'. The right pane displays the 'Commande - Détail' information panel, which includes details such as 'Source de données', 'Time out', 'Création', 'Dernière modification', 'Tables utilisées', 'Jointures entre les tables', 'liste des champs à visualiser', 'Critères de tri des enregistrements', and 'liste des ruptures'.
