Parameterization

Database

This screen is the same as [AdminTool](#), except that it has an Import button while the [AdminTool](#) has a Share button.

The Import button lets you automatically retrieve the definition of a previously shared data source.

When you click on the Import button, a dialog box asks which data source must be imported.

. It is possible to import several data sources at the same time.

In order to take advantage of the specific functionalities of JDE data sources, it is imperative that the data source be imported (even if it already exists on the machine). An imported data source can be recognized by the name of the ODBC driver that appears in the list of databases. For an imported source, the driver name must be “< Direct access via OCI > (Shared)” for an Oracle type database or “Vigilens - Shared DataSource” for a connection via ODBC.

Help Box

Global

The number of result files is the blue number in brackets in the [query panel](#).

Color

Set User

The user language is configured on this screen, among other things.

Information panel

This is where you can customize the panel [Overview](#).

The screenshot shows the Vigilens Designer application interface. The top menu bar includes 'VIGILENS DESIGNER', 'Accueil', 'Personnalisation', and 'Requête'. The 'Requête' tab is active, showing various execution and edition options like 'Imprimer', 'Ouvrir', 'Renommer', 'Supprimer', 'Publier', 'Copier', 'Couper', and 'Presse-papiers'. The left sidebar displays a tree view of database structures, including 'OZGE', 'RGR', 'SYLVAIN' (with sub-folders 'coherence', 'Commande - Détail (3)', 'Copie de F0911', 'F0911', 'groupe_de_requetes', 'rapprochement', 'rapprochement2', 'rapprochement3', 'RQ PRISE EN CHARGE MARCHANDISE (2)', 'SQL', 'test (6)', 'testtoto', 'union'), 'FORMATION7', 'MONITOR', 'NOUVEAUTES 7X', 'Plateforme Demo' (with sub-folders 'Extract4DDMRP', 'SECURITE JDE', 'test', 'titi', 'toto (1)'), and 'Modèles de requêtes' (with sub-folders 'PACK FINANCE JDEWARDS' containing numerous query templates). The main panel is titled 'Commande - Détail' and contains sections for 'Tables utilisées' (listing F4901 Sales Order Header file and F4911 Sales Order Detail file), 'Jointures entre les tables' (listing relationships between Socité doc., Type commande, and Type com.), 'liste des champs à visualiser' (listing fields like Société doc., Type commande, Type com., and Rq ligne), 'Critères de tri des enregistrements' (listing sorting criteria like Société doc., Type com., Type commande, and Rq ligne), and 'liste des ruptures' (listing break conditions like Société doc., Count(), Type com., and Type commande).
