

# Query Menu

This menu appears only if a query is selected [in one of the panels](#).

## Run

- Execute = executes the query using the interactive restitution mode defined at the query level.
- Print = prints the summary of the query.

## Editing

Most of these buttons are not used very much, as they have intuitive shortcuts.

- Open = open in edition the selected query = double click on the query.
- Rename = single click on a query already selected.
- Delete = button Delete on the keyboard.

The History button details the modifications and publications of the selected query.

## File

## Publish

Once the development of a query is complete, it must be published to make it accessible to other users. A location in the shared directory is then requested, as well as a name. Overwriting a shared query is possible with a warning.

## Inserted Files

This button allows certain actions on subqueries that have been incorporated into the main query. See [Query selection](#).

- : Displays a preview similar to the main Designer screen.

- : allows us to directly edit the embedded query.
- : execution of the embedded query alone.

-  : extract the embedded query.

## Linked Queries

The [linked queries](#) are a powerful way to improve the user experience. See [dedicated page](#).

## Result file

Gives access to all the results files available for this query.

It is possible to:

-  : open the result file.
-  : save it on the disk.
-  : Delete it.

You can select several result files simultaneously to make a mass deletion.

You can't delete a query that has result files.

It is possible to prevent a user from deleting files that are not his or her own. See [Authorizations](#).
