Query Menu

VIGILENS DESIGN	ER Home	Customisation	Query		
Run Frint	Open Solution	ame V Lin	serted Files nked Queries esult Files	Paste	A ★→ →A Export Import
Run	Edit	Fil	e	Clipboard	Translations

This menu appears only if a query is selected in one of the panels.

Run

- Execute = executes the query using the interactive restitution mode defined at the query level.
- Print = prints the summary of the query.

Edit

Most of these buttons are not used very much, as they have intuitive shortcuts.

- Open = open in edition the selected query = double click on the query.
- Rename = single click on a query or F2 on an already selected query.
- Delete = button Delete on the keyboard.

The History button details the modifications and publications of the selected query.

File

Publish

Once the development of a query is complete, it must be published to make it accessible to other users. A location in the shared directory is then requested, as well as a name. Overwriting a shared query is possible with a warning.

Inserted Files

This button allows certain actions on subqueries that have been incorporated into the main query. See Query selection.

• Displays a preview similar to the main Designer screen.

- 🔝 : allows us to directly edit the embedded query.
- 🗾 : execution of the embedded query alone.
- 🛅 : extract the embedded query.

Linked Queries

×

The linked queries are a powerful way to improve the user experience. See dedicated page.

Result file

×

Gives access to all the results files available for this query.

×

It is possible to:

- Image: open the result file.
- 🖪 : save it on the disk.
- 🔀 : Delete it.

You can select several result files simultaneously to make a mass deletion.

It is possible to prevent a user from deleting files that are not his or her own. See Authorizations.
