Query Menu

VIGILENS DESIGN	ER Home	Customisation	Query		
Run Frint	Open Solution	ame V Lin	serted Files nked Queries esult Files	Paste	A ★→ →A Export Import
Run	Edit	Fil	e	Clipboard	Translations

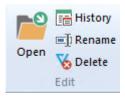

This menu appears only if a query is selected in one of the panels.

Run

- Execute = executes the query using the interactive restitution mode defined at the query level.
- Print = prints the summary of the query.

Edit

Most of these buttons are not used very much, as they have intuitive shortcuts.

- Open = open in edition the selected query = double click on the query.
- Rename = single click on a query or F2 on an already selected query.
- Delete = button Delete on the keyboard.

The History button details the modifications and publications of the selected query.

File

Publish

Once the development of a query is complete, it must be published to make it accessible to other users. A location in the shared directory is then requested, as well as a name. Overwriting a shared query is possible with a warning.

It is not necessary to publish subqueries, only the final execution request must be published (subqueries are automatically integrated into the main request).

Inserted Files

Minserted Files This button allows certain actions on subqueries that have been incorporated into the main query. See Query selection.

₩.	Inserted Files	x
